-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-3, and 21-23, drawn to an operation that enables a method for reducing interference between adjacent cells of a cellular radio system.

II. Claims 4-20, drawn to an operation that enables a cellular communication system of the type where base stations are equipped with directional antennas that can assume one of I number of directions of transmissions where  $I > 2$ , a method of increasing downlink coverage and traffic capacity.

2. Inventions I, and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct from each other because of the following reasons: Invention I deals with the operation that enables a method for reducing interference between adjacent cells of a cellular radio system; Invention II deals with the operation that enables a cellular communication system of the type where base stations are equipped with directional antennas that can assume one of I number of directions of transmissions where  $I > 2$ , a method of increasing downlink coverage and traffic capacity.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different modes or operation,

different functions, or different effects, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. An amendment of inventorship must be accompanied by request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
